SUMMARY

Computer Engineering student with strong skills in Java, Python, C, JavaScript, and backend development using SQL and full-stack web development using the MERN stack (MongoDB, Express, React, Node.js). Quick learner with excellent problem-solving abilities, seeking internship or entry-level roles to apply and grow technical expertise.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, SQL

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML, CSS

Tools & Frameworks: Git, Docker, Visual Studio Code

PROJECTS

Weather App

Web Application

Feb 2025

MERN Stack

- Built a responsive weather app fetching real-time data via OpenWeatherMap API
- Developed RESTful backend with Node.js and Express; managed data in MongoDB
- Designed intuitive frontend using React with Axios for API integration

Spam Review Classifier

Machine Learning Project

Sept 2024 – Nov 2024

Python, Scikit-learn, TensorFlow, NLP

- Built a hybrid model to detect spam movie reviews using ML
- Cleaned and labeled review data; extracted features with NLTK and pandas
- Visualized results and spam patterns using matplotlib and seaborn

Pharmacy Management System

Java Project

Jan 2024 – Mar 2024

JDBC, MySQL

- Developed a full-featured pharmacy management system with modules for inventory, sales, suppliers, and billing
- Implemented CRUD operations for medicines, customers, and suppliers using JDBC with MySQL
- Ensured data validation, role-based access, and secure login authentication

EXPERIENCE

Backend Development Intern

R3Sys

Aug 2024 – Oct 2024

Remote

- Worked on a Java-based web application, focusing on backend service development and maintenance
- Gained practical experience with Java, Servlets, JDBC, and web technologies
- Collaborated on application logic, database integration, and feature enhancements for improved performance
